"KEYMACRO is 77a5ca646e

Learn to read and write Old Persian cuneiform. Old Persian cuneiform is a writing system used in ancient Persia, present-day Iran. It was a syllabic writing system that used cuneiform to represent syllables. Old Persian cuneiform became popular when Cyrus the Great (600-530 BC) was ruler of Persia. The Old Persian language in use in the time of Cyrus was not the same as today's Persian. Old Persian cuneiform includes

different series of syllabic signs and is not a syllabary, but rather a syllabic alphabet. Old Persian is a combination of two alphabets, Elamite and Old Babylonian. Both of these two alphabets were used in Iran before Cyrus the Great to write the Persian language. The following codes are used in Old Persian cuneiform: 1. Small X sign (madda, ?) – is used to represent a nasal sound. 2. Large X sign (maddal, ?) – is used to represent an aspirated nasal sound. 3. Diagonal line (sag or maddh or

nem, ?) – is used to represent an affricate sound. 4. Small y sign (shadda, ?) – is used to represent a voiceless plosive sound. 5. Large y sign (shaddal or shaddal or nem, ?) – is used to represent a voiceless plosive sound. 6. Small i sign (dah or dakh or dah and dakh, ?) – is used to represent a voiceless affricate sound. 7. Large i sign (dagh or dagh and dagh, ?) – is used to represent a voiceless affricate sound. 8. Small i mark (with a d in the circle, ?) – is used to represent a voiced affricate

sound. 9. Large i mark (with a d in the circle, ?) – is used to represent a voiced affricate sound. 10. Small dot (damga or damgha or damga and damgha, ?) – is used to represent a liquid sound. 11. Large dot (

What's New in the Old Persian Cuneiform?

Old Persian Cuneiform is a fun and educational application that will test your Persian Cuneiform knowledge. Questions will be provided for you to answer. Each

question is comprised of several lines of cuneiform and has a corresponding answer in the bottom line. The application provides a handy feature that will randomly give you a hint after each question. Features: - Sign up for our free newsletter to receive news about new releases. - Test your knowledge by answering to the multiple choice questions. - Randomly give you a hint after each question. - Statistics for your past test are provided. - Refresh your knowledge by answering to

multiple choice questions. - Test your knowledge in 6 different languages: Old Persian, Modern Persian, Middle Persian, Khuzari Persian, Khorasani Persian, and Arabic. Requirements: The program requires a Java 1.5+ runtime and a minimum screen resolution of 1024 x 768.
