

Software piracy is theft. The use of cracks, passwords, serial numbers, registration codes, key generators, CDs, hacks is illegal and hinders further development. However, from the point of view of the consumer, this is not theft. Unlawful use of software is use that may even be legal and safe in some cases, such as when it is intended to be used but not under contract. If you have purchased the software, you have probably agreed to the license terms of use.
