Enter keygen options: Enter the serial number and click Generate. Paste the serial number in the appropriate field. Click on the button Process and wait until the process is finished. You will find the keys generated for you in the Autocad AppData folder. Now you can copy this key into your Autocad installation. A: To my knowledge there is no way to have a key generated by the software. You will have to send a serial number to the Autocad support and they will generate a key. They will give you the path where they will save the key. Copy the key from the folder and paste it in the Key configuration section in the Autocad application. Q: Can you put a large screen Television on a smooth surface without condensation? Is there a way to securely affix a large screen Television on a smooth surface without condensation? A: The best answer you are going to get is "yes, you can" and "no, there's not a good way to do it". (I can't think of a way to do it, and I haven't seen any examples of doing it. Maybe some people do it and leave it to its own devices.) The best thing to do is to keep an eye on it. Make sure that it isn't going to be moved, dropped, or tipped over in any way. Also, be aware of possible vandalism or other damage to the screen. Keep an eye on it. When it starts to get drippy, seal it off with duct tape or something else. Condensation isn't going to be a problem, if it is a concern for you, then just keep it clean. If it's getting too dirty, then just clean it off. A squirt of compressed air can get the dust off. Another solution is to mount it on something like the underside of a cabinet door, or on the back of the refrigerator, etc. The idea here is to isolate it from things that can move or be shaken around. There are commercially available solutions for mounting things to a specific surface, for example this: You can also get products that are specifically designed for this purpose. Most of them look like this: The advantage is that the mounting clip is usually strong enough to support the weight of the monitor, which eliminates the need for
