Offshore, LLP, A Professional Liability Insurance Company, was formed in 1998 by Paul Casolaro and was headquartered in Manhattan. Offshore claims to have insured more than 500 clients with total insurance exposure of over \$10 billion. The Company issued 25 million policies that primarily insure the banking, corporate and non-profit sectors and claims to have received over 1,000,000 claims totaling approximately \$350 million. Casolaro was killed in 2002 at age 38 after a four-year battle with depression and anxiety. The firm has produced three reports on the deaths of John F. Kennedy, Martin Luther King Jr. and Robert F. Kennedy. The firm stated in a press release after Casolaro's death that the investigative reports will be published in the wake of its clients being targeted. "There was a great deal of concern and anguish over our client Paul's death," said Marvin Mitchelson of the firm, "and any reports that we may publish by our firm will be directed to the very important issues of profiling, identification, and the issue of suicide as a tool of misdirection and deceit and as a tool of oppression." In response to that press release, the Director of the National Institute of Mental Health stated that "There is no evidence that John F. Kennedy was murdered. There is no evidence that the deaths of Robert F. Kennedy, Martin Luther King, and many others was a murder." See also John F. Kennedy assassination conspiracy theories References External links Casolaro, Paul (2001), "The Suicide Society". The American Conservative, August 9, 2001. This article is a stub. You can help OfficeDynamics Wiki by expanding it.Q: How to use MujIT with MPI In order to be able to use MujIT (and Cython), I need to compile my C source files using mujit with the mpicc interface. I have an MPI program that runs fine without any special care. I have isolated the problem to using MujIT. Now, when I use mujit, I end up with a Segfault upon reaching Cython's configuration. I have noticed that the linker command used by MujIT is different from the usual one, i.e., it doesn't set LD_FLAGS_DUMP_MODULES=1 and instead it contains directly some specific flags. I couldn't find any information about it in the
