Open Autocad. Select Add > Insert > Tab then select Texture > Mesh. Press the keygen to generate the texture. It will show the error because it's using an older version. To change the version, download the Autocad newer version and the keygen. Go back to the original Autocad and save the new texture. Open Autocad again and select AutoCAD > Tools > Autodesk Texture Tool. Select the texture and press Apply. It will change the texture of your object. I found a piece of orange tape and secured one end to the front, (the tape was about the size of the cage). Then I secured the other end to the top side, leaving it at about 10cm or so from the bottom. The other end was secured to the back (the tape was about the width of the cage, or slightly larger). (Sorry for the bad photo, it was dark, I don't know what I did, it was a quick rush job and I'm not too great with photography!) I placed the bananas on the tape, and then moved the cage over to the closest heater. I turned it up, and placed the mouse box on top. After about 10 minutes, the temperature inside the cage was slowly dropping (I think it went from room temperature to about 6°C), and the bananas had begun to freeze. I turned the heat off and left the cage to cool down a little. The bananas all fell off, and the mouse box. When I returned the next morning, there was no trace of mouse, banana, tape or cage. The cage is now in the freezer (it's very thick glass), but the bananas and tape were plonked on a shelf in the cupboard.
